R. F. D. No. 2

Torrington, Conn.

Greetings

To Our Friends of the Dahlia :—

It is again our privilege to greet our many friends through the pages of this, our seventh annual catalogue.

In between its covers, you will find a list of dahlias, some new and some old varieties, but all are true to name with prices that are within reason.

We welcome the public to visit our gardens any time during the blooming season.

Every root is carefully packed for shipment and guaranteed true to name.

Thanking you for past favors and hoping that we may again have the pleasure of serving you, we are

Very truly yours,

FRED W. THOMAS & COMPANY

General List of Dahlias

OUR 1938 INTRODUCTION

Edwina May—(I. D.)—Introducing this dahlia which scored (82) at the trial grounds of the American Dahlia Society at Storrs Conn. This color is at the base of petals around center—pinard yellow, middle and tips of petals light phlox purple which grows to a height of 6 feet with flowers that are medium to heavy in size, 5 to 8 in., with a depth average of 3 in., on good stem\$ 5.00

FEW OF THE LATER INTRODUCTIONS

Mary Tallmadge—(Peck-Alling) (I. D.) It is difficult these days to get a variety which is distinct or an improvement in color over existing varieties. This is decidedly different, being a peculiar old rose shaded mulberry pink with a smoky overcast. The growing habits are ideal, long stems, strong plants with heavy leaf resisting foliage. It may be grown as large as the best of them and the blooms are produced freely **Roots \$7.50 Plants \$ 3.00**

Barbara Ann—(I. D.) This bi-color flower is uniform in size and marking. Every plant is crowded with bloom and makes an outstanding attraction. Deep rose red with white tips; 6-7 inches in diameter; 4-5 inches deep without any disbudding\$ 3.00

Rex—(I. D.) A combination of buff and light golden yellow, suffused with peach pink and golden sheen. The long petals face outwards making a very artistic bloom 10-12 inches in diameter, 5-7 inches deep on strong stems.....\$ 5.00

Jessica Dragonette—(Semi Cac.) The color chart shows the color to be picric yellow, suffused with Venetian pink. However, a description which we think more readily visualized would be peach and cream with a shading of deeper pink on the reverse of the petals\$ 2.50

Hunt's Velvet Wonder—(I. D.) Color is violet-purple and burgandy to true purple. Blooms are large deep and massive....\$ 2.50

JOIN THE

AMERICAN DAHLIA SOCIETY

We invite our friends and customers to join the American Dahlia Society and become a part of this great National organization whose interest is devoted solely to the improvement of the Dahlia.

The Quarterly Bulletin—a real Dahlia Magazine—gives all the up to date Dahlia news, information about, and illustrations of new varieties, the latest cultural hints and is a real worth while guide to any lover of Dahlias. The Bulletin alone is worth many times the cost of the annual dues.

Trial Gardens are maintained at Connecticut College, Storrs, Connecticut, and The Michigan Agricultural College, East Lansing, Michigan, where new varieties are tested and scored each year. A test garden is also maintained at Cornell University, Ithaca, New York, for research work on insect and disease control. Full reports from all these gardens are published from time to time.

Dahlia "fans" in every state of the Union and many foreign countries are members and frequently contribute news to the Bulletin. Membership includes admission, and the privilege of exhibiting at all our National exhibitions which are held each September in some National center.
